### 四、Feature 产品特点

TZN2C-12 series laterally-installed vacuum circuit breaker is a new generation product, developed on the basis of various laterally-installed circuit breakers, featuring with small size, high reliability and maintenance free.

The vacuum arc extinction device adopts the design equipping the vacuum arc extinction chamber and main electric conduction loop into a solid insulation poles by epoxy resin insulation poles. Therefore, the product performs with reliable insulation. The arc extinction chamber surface avoids environmental influence and it realized the maintenance-free purpose.

Flexible installation modes make it easy to integrate it with disconnector and load switch, and both sides are optional for the installation.

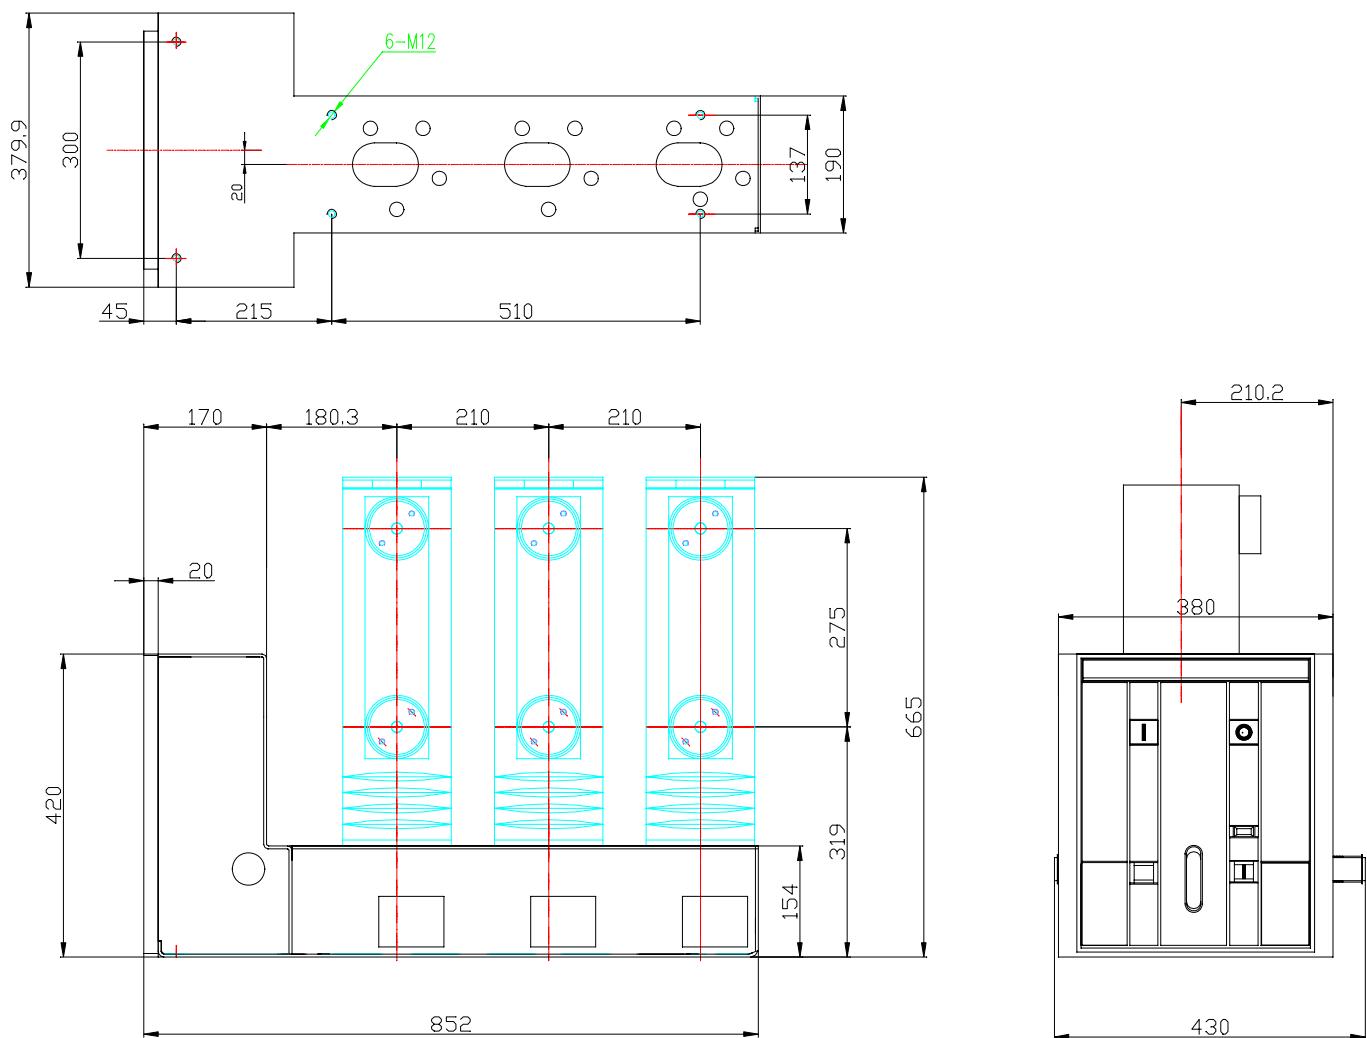

TZN2C-12 系列户内侧装真空断路器是在多种侧装断路器产品的基础上，为进一步实现真空断路器的小型化、高可靠、

免维护而设计的新一代产品。

该系列断路器灭弧装置采用环氧树脂绝缘筒将真空灭弧室、主导电回路装配成一个整体,绝缘可靠、真空灭弧室表面受外界环境的影响小,真正实现免维护;

安装方式灵活,能方便地与隔离开关、负荷开关的配合,左右侧均可安装。
